MatBoss Now Available in the App Store

MINNEAPOLIS -- MatBoss can be found by visiting the App Store on an iPad and searching 'MatBoss' (no spaces). The app will appear for download and installation.

This week MatBoss customers will receive an email with login credentials and directions on how to set up training. In the meantime, customers can download MatBoss and try it out. Customers won't be able to upload video or match data until they have completed training, but can still put the app through its paces.

Don't forget, MatBoss is completely integrated with TrackWrestling. Any scoring done on MatBoss will transfer into the TrackWrestling system with just a couple of clicks.

Those who have not yet become MatBoss customers can download the app on an iPad and test the product or set up a live demo via video conference.

We are extremely excited to bring this revolutionary new app to the wrestling community. Download your copy of MatBoss and experience it for yourself.

About MatBoss:

Created by coaches for coaches, MatBoss for iPad® integrates wrestling stats directly into the video you record for each match, completely replacing the need for labor-intensive pencil and paper scoring systems. Several of the nation's top wrestling programs across all divisions of college wrestling and high school wrestling use MatBoss. For more information on MatBoss, visit www.MatBossApp.com.
