MatBoss to integrate with TrackWrestling

MINNEAPOLIS -- MatBoss and Trackwrestling are partnering to integrate wrestling statistics and results captured within MatBoss directly into Trackwrestling, it was announced on Friday. The development of this integration is underway and will be available for the upcoming 2015-16 wrestling season.

"Trackwrestling is the leading wrestling event management platform available on the market," said Jeremy Higgs, a partner with MatBoss. "Coaches that utilize the video and statistics management capabilities of MatBoss in conjunction with Trackwrestling's event management platform are giving themselves and their programs an advantage."

Added Justin Tritz of Trackwrestling:

"We are very excited about what MatBoss has to offer and look forward to integrating it with the Trackwrestling platform for the 2015-16 season. The iPad application they have created is a great compliment to our statistics program and the Trackcast tools we have and continue to develop."

The MatBoss-Trackwrestling integration will streamline the process of reporting results, eliminating the need to manually enter statistics on Trackwrestling. Teams registered with MatBoss will receive a Trackwrestling statistics program. Users will have the ability to pull roster and events into the MatBoss application and push results data back into Trackwrestling. For more information on Trackwrestling, visit www.trackwrestling.com.

About MatBoss:

Created by coaches for coaches, MatBoss for iPad® integrates wrestling stats directly into the video you record for each match, completely replacing the need for labor-intensive pencil and paper scoring systems. Several of the nation's top wrestling programs across all divisions of college wrestling and high school wrestling use MatBoss. For more information on MatBoss, visit www.MatBossApp.com.
